# Group 9000-W16D-DONUT — “Beyond” MEETING MINUTES

## Meeting #5 (Week 5)

| | |
|---|---|
| Date | Friday 16 October 2026 |
| Time | 11:00-12:00 (client Demo A review sync) |
| Time Keeper | Xuhui Wang (Hennessy) |
| Attendees | Team: Xuhui Wang (PO); Yinqjia Xie (SM); James Liu (FE); Vaibhav Vaibhav (BE); Xinghao Fu / Senhao (BE); Anoak Du (QA). Client: Kholoud AlQattan (co-clients Dr Basem Suleiman, Dr Gelareh Mohammadi). |
| Apologies | None |
| Please bring/read | Demo A build; Part 1 open-questions list; P13 project spec. |
| Other resources | Microsoft Teams channel; Demo A recording / screenshots. |
| Meeting purpose | Client Demo A review - capture the client's highly positive feedback on Demo A, and resolve the three open technical clarifications (participant-code mapping, mid-session export, video retrieval). |
| Next Meeting | Client sync: Friday 30 October 2026 (fortnightly). Next internal lab: Week 6 (Wed 21 Oct 2026). |

## Agenda

| Item | Agenda Item | Assignee | Notes |
|---|---|---|---|
| 1 | Demo A walkthrough & client satisfaction | Presenters: Team; Client (reviewed) | The team demonstrated Demo A (Researcher experiment-builder with the fused three-column layout + James's blue-white UI, the Participant flow, and the unified single-clock event log). The client was VERY SATISFIED - explicitly praised the intuitiveness of the three-column researcher builder, the restrained blue-white visual tone, and the working second-level time-synchronised event |

| | | | |
|---|---|---|---|
| | | | log. No blocking issues raised; Demo A is considered a success. |
| 2 | Participant code <-> real person mapping (Q1) | Client / Team | Clarification sought: how a participant code maps to an actual person, and how the Researcher knows Student A used code (1234). Raised for client confirmation; identity-privacy model to be confirmed in writing. |
| 3 | Mid-session export behaviour (Q2) | Client / Team | Clarification sought: if a Participant is mid-experiment when the Researcher exports, is that in-progress record retained and included? Rule to be defined with the client. |
| 4 | Video file retrieval vs CSV (Q3) | Client / Team | Clarification sought: export is CSV - how are the video files obtained, where stored, and how linked back to the CSV. Storage/filename convention to be confirmed. |
| 5 | Next steps & schedule | PO / Team | Post-Demo A: finalise Participant flow, begin Result Visualization; resolve the three clarifications; next client sync 30 Oct 2026. |

## Open Actions

| Item | Action/Discussed | Deadline |
|---|---|---|
| 1 | Confirm the participant-code <-> identity model with the client (decouple identity from code; pre-generated vs self-entered; duplicate handling).<br>Owner: PO / Client | Within 1 week - by 23 Oct 2026 |
| 2 | Define the mid-session export rule (retain/export in-progress data; completed-only vs all statuses).<br>Owner: Backend (Senhao / Vaibhav) | Sprint 2 - by 3 Nov 2026 |
| 3 | Finalise media storage & retrieval design on OneDrive (folder structure + filename convention linking files to CSV rows).<br>Owner: Backend / PO | Sprint 2 - by 3 Nov 2026 |
| 4 | Continue Participant flow development (after Researcher UI; per reconfirmed priority researcher > participant > admin).<br>Owner: FE (James Liu) | Sprint 2 - Demo B 4 Nov 2026 |
| 5 | Begin Result Visualization module.<br>Owner: Team | Sprint 2-3 |

## Questions for Mentor

- Demo A grading criteria / marking rubric still not released by the course - confirm with tutor (Lucas Tsitsurai da Silva) how Demo A is assessed, given the client's positive feedback.
- Confirm the participant-code privacy model (identity decoupled from code) aligns with the pending ethical approval before build.

## Questions for Client

- Q: How is a participant code mapped to an actual person? In other words, how does the Researcher know that Student A was the one who used participant code (1234) to take part in the experiment? (Raised at Demo A review - awaiting client written confirmation.)
- Q: If a Participant is still mid-experiment (session not finished) and the Researcher triggers an export, is that in-progress record retained and included? (Raised at Demo A review - awaiting client written confirmation.)
- Q: You mentioned the export format is a CSV file - how are the video files obtained? Specifically, where are they stored, and how are they linked back to the exported CSV? (Raised at Demo A review - awaiting client written confirmation.)
