Group 9000-W16D-DONUT — “Beyond” MEETING MINUTES

Meeting #2 (Week 2)

Date	9.23 (Week 2)
Time	4:00 pm – 6:00 pm
Time Keeper	Hennessy (Xuhui Wang)
Attendees	6 — full team: Anoak Du, Xinghao Fu, James Liu, Vaibhav Vaibhav, Xuhui Wang (Hennessy), Yinqjia Xie (internal prep meeting; client not present)
Apologies	None
Please bring/read	P13 project specification & client mockups; Guidelines for working with Clients; COMP9900 P13 Team Plan; Team Project Guide v2.0
Other resources	MS Teams (client contact); UNSW room-booking system; GitLab; Jira
Meeting purpose	Determine the room for the first in-person client meeting; clarify the team's responsibility division (roles); prepare the question list for the in-person client kickoff.
Next Meeting	Client kickoff meeting — CONFIRMED: Main Library L4 RM412, Fri 25 Sep 2026, 10:30 am – 2:30 pm (in person; MS Teams fallback). Next team sync: Week 3 lab, Wed 30 Sep 2026.

Agenda

Item	Agenda Item	Assignee	Notes
1	Confirm team roles & responsibility division	All (roles decided)	Confirmed division: PO = Xuhui Wang (Hennessy); Scrum Master = Yinqjia Xie; Frontend = James Liu; Backend = Vaibhav Vaibhav + Xinghao Fu (Senhao); Testing = Anoak Du. (GitLab Maintainer not separately assigned in this decision — to be covered by Backend/PO as needed.)
2	Book the room for the first in-person client	Anoak Du	CONFIRMED booking for the in-person client kickoff: Main Library, Level 4, L4 RM412. Date:

	meeting (confirmed)		Friday 25 September 2026, 10:30 am – 2:30 pm (Kensington campus; MS Teams fallback if needed).
3	Prepare the client kickoff question list	All (Hennessy coordinating)	Adopt the kickoff agenda from Client Guidelines §4: communication style / frequency; definition of success; MVP vs final deliverable; staged delivery; external dependencies (datasets / APIs / sample data). P13-specific: scope of 'multimodal' (screen+audio only or webcam); single-clock sync definition; consent & ethics; recording storage; participant profile; client mockups.
4	Operational setup to enable the kickoff	GitLab Maintainer / Scrum Master / PO	Create GitLab team + repo + work-diary folder; sign up Jira and scaffold the Product Backlog (Epics/Objectives → Stories); PO to send MS Teams introduction to the client (Kholoud AlQattan; cc co-clients Basem Suleiman, Gelareh Mohammadi) and propose a kickoff slot.

Open Actions

Item	Action/Discussed	Deadline
1	DONE — Room booked: Main Library L4 RM412, Fri 25 Sep 2026, 10:30 am – 2:30 pm. Calendar invite + MS Teams fallback to be issued to the client.	Completed (25 Sep 2026)
2	Send the MS Teams introduction to the client and confirm the kickoff details (booked: Main Library L4 RM412, Fri 25 Sep 2026, 10:30 am – 2:30 pm); share a short agenda in advance.	Wed 23 Sep 2026 (before kickoff)
3	Finalise the client kickoff question list (Client Guidelines §4 + P13 specifics); complete GitLab repo + work-diaries and scaffold the Jira backlog.	Question list before kickoff; GitLab/Jira by Wed 23 Sep 2026

Questions for Mentor

- For the first in-person client meeting, is Ainsworth 101 (our lab room) bookable by students, or should we use a CSE seminar room / library meeting pod?
- Does the course require the kickoff to happen by a specific date, or simply before the proposal is due?
- Should the individual work-diary live as a GitLab folder (per the Team Plan) or follow a specific template?
- Any required format / etiquette for the first client contact over MS Teams?

Questions for Client

- What does 'success' mean for this study platform beyond the brief (papers, testimonies, study outcomes)?

- MVP vs final deliverable — what is the minimum demo-able core, and must-have vs nice-to-have?

- Scope of 'multimodal' capture: screen + audio only, or webcam too?
- External dependencies: datasets, APIs, sample data, schemas, API contracts and when available?
- Can we get the client's existing mockups now?
- Who are the study participants (engineering-design students), and what does the researcher need to see afterwards (dashboard / export format)?
- Consent & ethics: is UNSW ethics approval already held, or must the platform provide consent flows? Where can student recordings be stored (UNSW-approved storage)? Retention / deletion rules?
- Single-clock synchronisation — exact definition for the analysis (event-log precision, alignment of chat vs media)?
